

DEALGAPIQ

Find a deal of a lifetime.

9 reasons investors hunt on Search & Discover instead of a listing site

dealgapiq.com/for/find-investment-property

01

Every pin is a number, not a photo

Price on top, monthly rent as a percent of price underneath. Scan a whole ZIP for the strong ratios in seconds. No opening forty listings to find the two worth a call.

02

Search homes that are not for sale

Owner Leads flips the map to properties by how long the owner has held them (10 to 20, 20 to 30, 30 plus years), whether they live there or are absentee, and whether the home is off-market or listed. Long tenure plus absentee is where high equity and a willing seller meet.

03

Distressed deals are the map legend

Foreclosure, auction and pre-foreclosure show as red pins. Turn on one, two or all three and the map redraws to only those.

04

Expired listings, verified live

Homes that were listed and did not sell (expired, withdrawn, cancelled, delisted) are a motivated-seller signal. Each candidate is checked live on the listing source and dropped if it is back on the market or already sold, so you are not calling on stale leads.

05

Days on market, as a filter

Thirty, sixty, ninety or one hundred twenty days and up. A home sitting four months at the same price is a seller who has heard no for four months. The property card carries the count too.

06

Draw your own area

Trace the blocks you actually farm, the side of the highway you want, the streets near the school. Results snap to your shape, not a ZIP boundary.

07

Reviewed or Pass, right on the card

Two buttons on every property card. Triage a whole neighborhood from the map without a spreadsheet, and come back to what is left.

08

Analyze is one tap from the pin

Every card has an Analyze button. It runs the same free Discovery as the homepage: the price where the deal works, the Deal Gap to the asking price, and four ways to close it.

09

List Download (Pro)

Take the filtered results off the map as a list. Your distressed set, your absentee-owner set, your 90-day set, ready for the next step.

Pick a pin. Run the address. Know what to offer.

The Discovery is free with no account: the price where the property works, the Deal Gap to the asking price, and four offer structures with the script for each. A free account saves your properties. Pro opens the full map and the downloads.
