

DEAL SOURCING

7 ways to find off-market properties

Ranked by effort. Swipe →

01

Public records

Absentee owners. Tax delinquent. Code violations.

Low cost. High setup. Every conversation starts cold.

02

Pre-foreclosure filings

Lis pendens or notice of default, at the county recorder.

Everyone contacts these owners. Speed and a clear explanation win.

03

Probate

Court dockets. The personal representative can sell.

Simplicity beats top dollar. Respect beats follow-up.

04

Driving for dollars

Visible neglect, then look up the owner.

Slowest per lead. One of the highest converting.

05

Wholesalers

Get on every active list in your market.

Fastest inventory. Their fee, their numbers. Re-underwrite everything.

06

Agents

Pocket listings. Expireds. Withdrawns.

Nearly free. They hear about sales before they happen.

07

Listing keywords

"As-is." "Investor special." "Cash only."
"Seller to make no repairs."

The on-market off-market. Already priced for you.

THE RULE UNDERNEATH

Run two or three continuously.

None of them produce a price. That is the second half of the problem.

Full breakdown, with how to price a deal that has no asking price:
